SOLUTION SERVICES WEBAPP Requirements

1-) Responsive webapp

2-) Login page for administrators

3-) The primary screen could be the dashboard indicating the amout projects,

PROFILE

DASHBOARD

PROJECTS

COMPLETED PROJECTS

LOGOUT

4-) In the top left a menu with icon of the loged in user and settings to update this user, one section in this menu to mage projets , other section to send the completed project, other to archived projects and other to return to dashboard.

5-) the section to create project can be mode list and need to be a way to filter by , name, project ID or created date and search bar.

PROFILE	+			SEARCH
DASHBOARD	ID	NAME	STATUS	PROGRESS
PROJECTS	1001	CIUDAD DEL SOL	PENDING 5 doc	
COMPLETED PROJECTS				
ARCHIVED				
LOGOUT				

6-) Need a button + to add new project with a pupup to add initial information of the project (Name, dimentions in m2, contact, email, phone, and the way to add labels). At the end submit button to create the project and redirect to the working process of documents checklist.

PROFILE	+			SEARCH
DASHBOARD	ID	NAME		PROGRESS
PROJECTS	1001	CIUDAD D	NAME	
COMPLETED PROJECTS			Contact person Phone	
ARCHIVED			Mail	
LOGOUT			Address	
			project labels	

In this checklist there will be 4 principal colums of diferent entities

- Ayuntamiento
- Medio ambiente
- Turismo
- Ministerio de vivienda

I want to notify to my customer about missing documents some times for that reason I want to know if is possible the next example:

But there will be a diference if the input M2 value is over 10,000 m2 there will be displayed 2 entities more than the default 4

Will have:

- Ayuntamiento
- Medio ambiente
- Turismo
- Ministerio de vivienda
- Inapa
- CEPM

	PROJECT NAME + than 10,000m2					
	AYUNTAMIENTO	MEDIO AMBIENTE	TURISMO	MINISTERIO DE VIVIENDA	INAPA	CEPM

LOGOUT	75%	75%	75%	75%	75%	75%

7-) The last page is a view page for customers without user authentication , the idea is that the customer receive an email when a new project is create with his mail . The customer will receive the project name a template with all necessary documents in the diferent entities and the project ID. With this project ID the customer will be able to load the defined url and put his project id to see state of his project

https://domain.com/states/

ENTER YOUR PROJECT NUMBER

Afther the client set the project number will display the estatus of his project and see the missing documents and the statements status and global status
